PROFESSIONAL SUMMARY

Aspiring Full Stack Web Developer with hands-on internship and project experience building responsive web applications using Python, Django, React.js, and SQL. Delivered CRM frontend components, integrated frontends with Supabase database, and built full-stack projects featuring authentication and CRUD workflows. Strong fundamentals in component-driven UI, REST APIs, and database integration; seeking an entry-level/full-stack developer role to contribute to production projects and continue growing technical skills.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript.

Frameworks and Libraries: React.js, Bootstrap, Tailwind CSS, Django

Databases: SQL

Tools and Methodologies: Git, GitHub, VS Code, Postman

Frontend: HTML5, CSS3, Responsive Design, Component-Based Architecture

Backend & APIs: Authentication, REST APIs, CRUD Operations, Supabase,

Professional Experience

Full Stack Developer Intern, Digital Edify, Hyderabad, September 2025 – November 2025

- Developed CRM frontend by building 10+ responsive UI components using React.js, TypeScript, JavaScript, HTML5, and CSS3, improving UI consistency and cross-device usability across desktop and mobile.
- Integrated frontend with Supabase (PostgreSQL) to implement reliable data storage, retrieval, and real-time support for CRM workflows, enabling smooth CRUD operations for users and records.
- Implemented reusable, modular React components and standardized styling patterns, reducing repetitive code by 20% and improving long-term maintainability.
- Built client-side validation and authentication flows and consumed backend REST APIs to secure user actions and streamline data-driven CRM features. Collaborated with product and backend teams using Git and GitHub; performed code reviews, validated API responses with Postman, and maintained component documentation to accelerate team onboarding.

Technologies: React.js, TypeScript, JavaScript, HTML5, CSS3, Supabase, GitHub

PROJECTS

Travel Booking System

- Built a full-stack travel booking application with a Django backend, implementing authentication and CRUD features to manage users and bookings with structured database models.
- Designed responsive frontend pages using React.js, focused on usability and performance, integrating with Django APIs to ensure smooth data handling and consistent user flows across devices.

Technologies: Python, Django, React.js, SQL, REST APIs.

E-Commerce Fashion Website

- Built a responsive e-commerce frontend for dress products using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS with optimized UI for better navigation and usability; ensured cross-device compatibility across mobile, tablet, and desktop.

Technologies: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

EDUCATION

Bachelor of Biotechnology: Vivekananda Degree College, Affiliated to Osmania University,

2023 – 2026

Intermediate (BiPC): Government Junior College, Vikarabad, Telangana,

2021 – 2023

CERTIFICATIONS: Python Full Stack Development Certification
